

Open ECW Imagery with ER Viewer

Note: If you have not downloaded and installed the ER Viewer please visit <http://imageserver.sanantonio.gov/Downloads.asp> and click on “ER Viewer” to begin the download.

1. Go to <http://imageserver.sanantonio.gov/>
2. Click on “City of San Antonio’s Image Server” at the bottom of the page. You should now see a web page that looks similar to the one below.

3. Select the image that you are interested in by choosing one from the dropdown menu under **Image**.

4. Click on the “About” button under the *Menu* section.

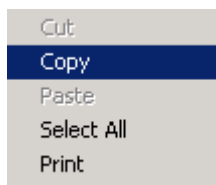

5. A separate web browser will open displaying information about the image.
6. Highlight the location information.

Information About Current Image

Name:	2001 Mosaic
Date Produced:	March 2001
Projection:	Texas State Plane South Central Zone
Datum:	NAD83
Location:	ecwp://imageserver.sanantonio.gov/Imagery/2001/Mosaic.ecw

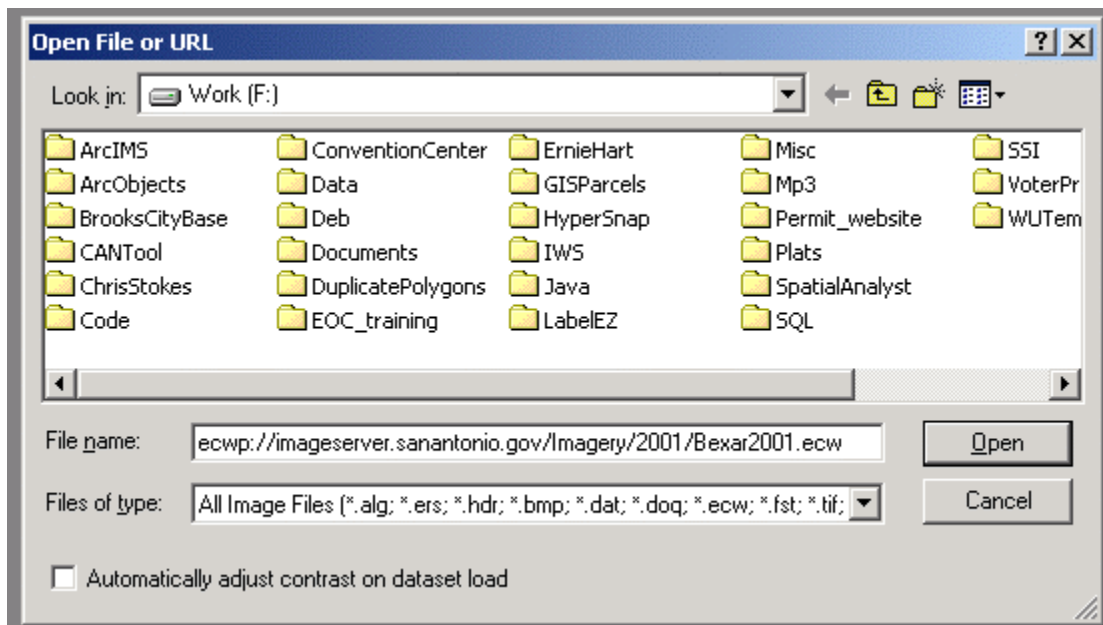

7. Click the right button on your mouse and select “Copy”

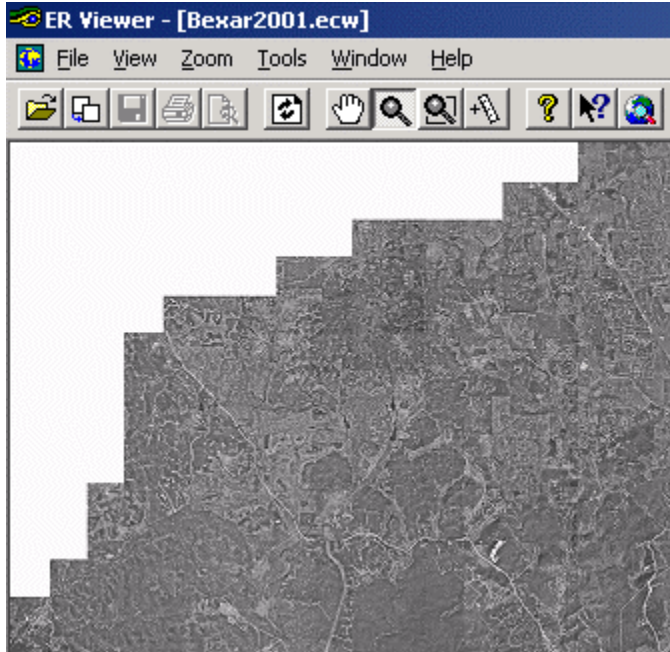

8. Open the ER Viewer program from your computer. If you do not have the ER Viewer program installed on your computer please visit <http://imageserver.sanantonio.gov/Downloads.asp> and click on “ER Viewer” to download it.
9. Click on the “Open File or URL” button

10. Paste the location that you copied from step 7 into the “Open File or URL” dialog box (Click the right button on your mouse and select “Paste”) and click “Open”.

11. You should now see an image.

12. You can now zoom, pan, measure, etc...

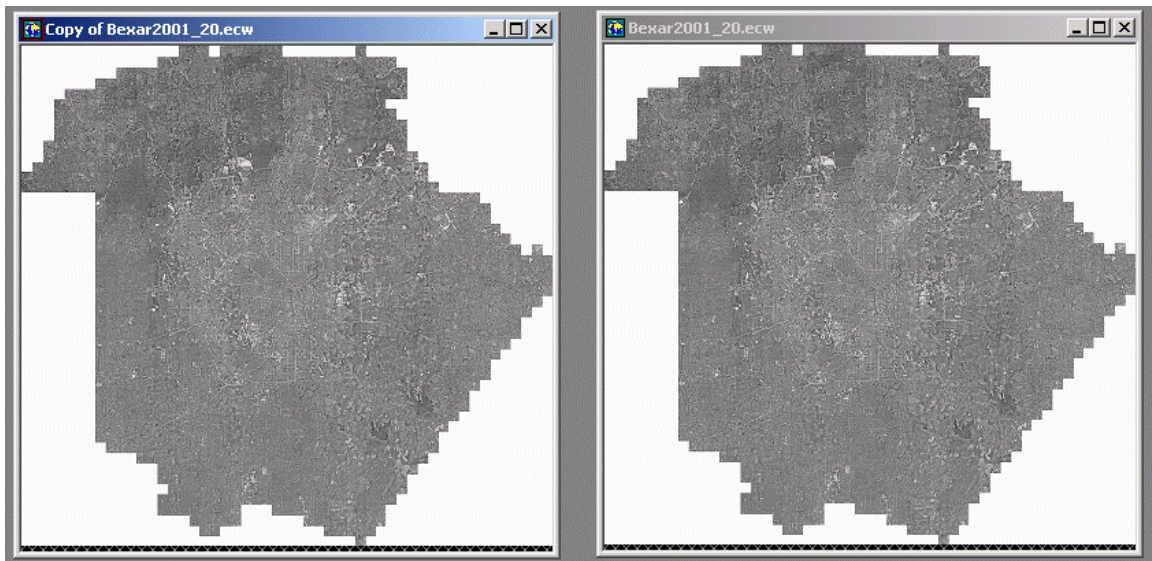

Save a Copy of the Image to Your Computer

Note: Follow the steps below after you have opened an image in the ER Viewer. You should not save the entire photo to your computer. This function works best when you choose a small area to save.

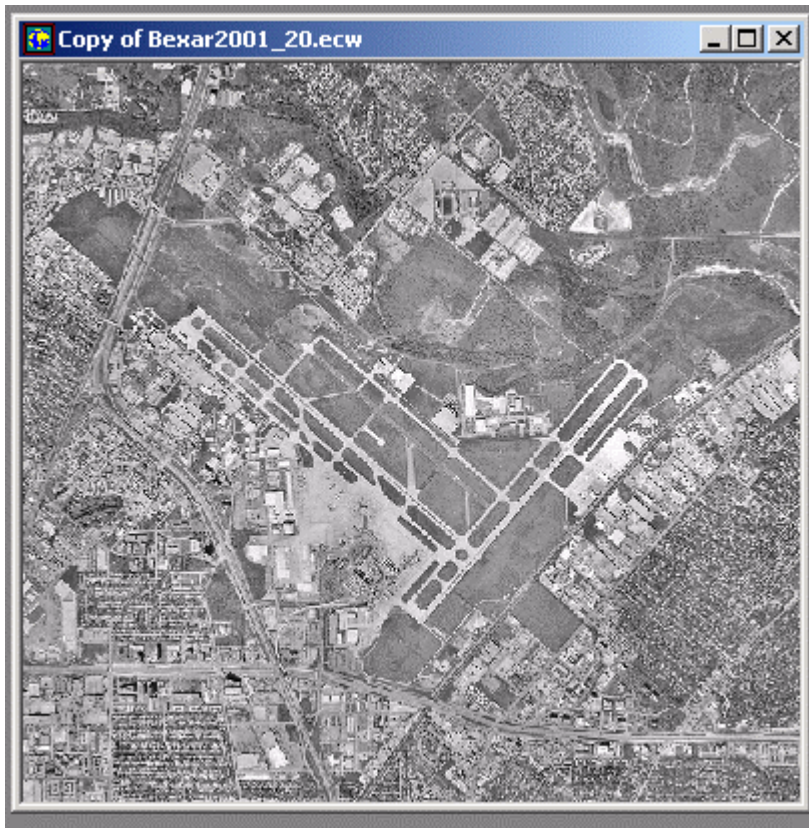

1. Press the “Duplicate image” button

2. You should now see a copy of the image you opened.

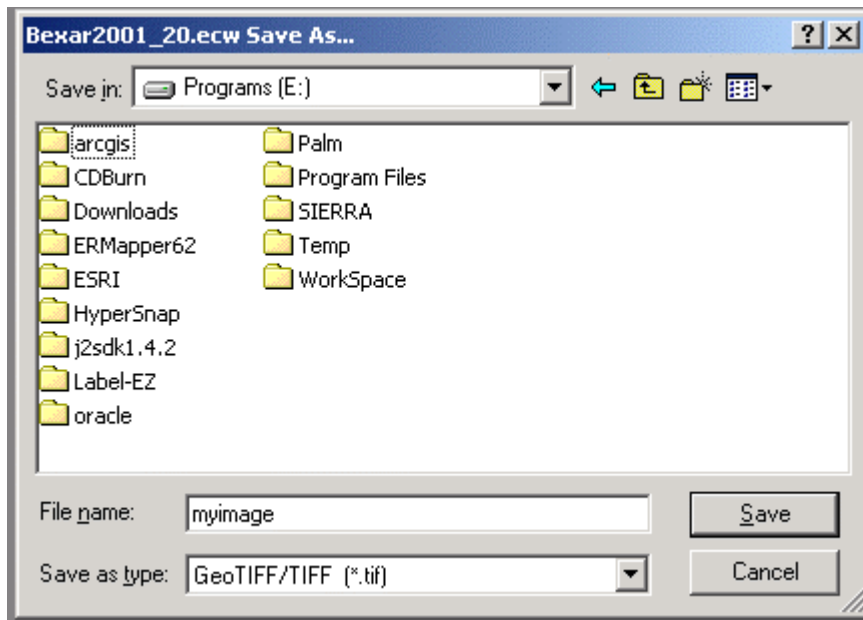

3. Zoom into an area on the duplicate image that you want to save to your computer. You can use one of three methods for zooming. Please refer to the ER Viewer help for information on how to do this.

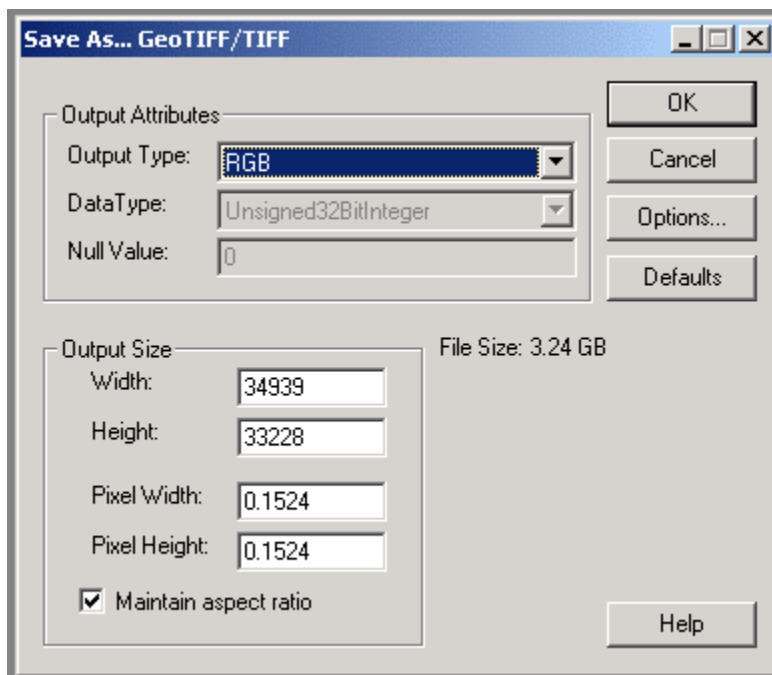

4. Now press the "Save As" button to save the image to your computer.

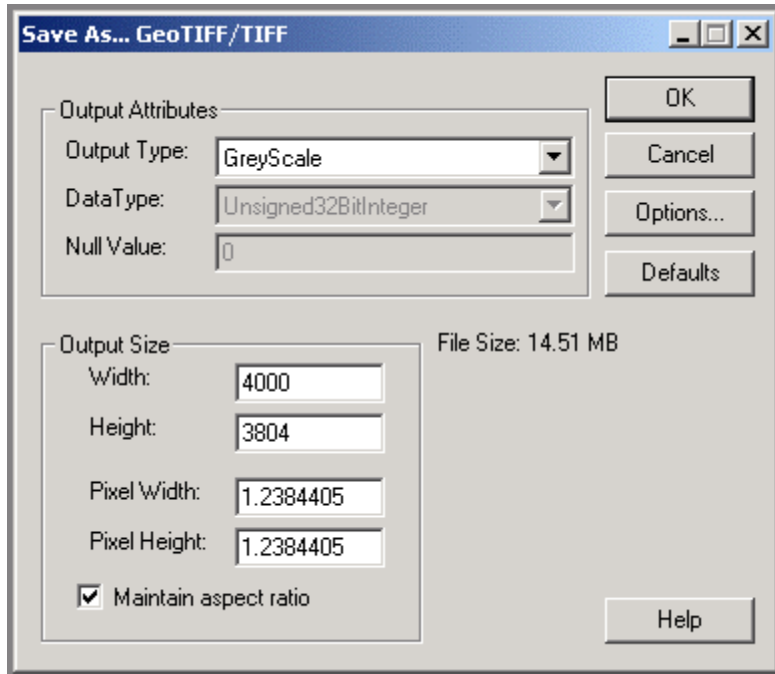

5. A dialog box should appear. Browse to the location where you want to save your file, type in a name, and press “Save”.

6. A second dialog box should now appear.

7. If the image is black and white change the “Output Type:” to greyscale, otherwise leave it alone.
8. If the “Width:” (under “Output Size”) is larger than 4000 then change it to 4000, otherwise leave it alone.

9. Now click “OK” and the image will be saved to your computer.
